Sento Lan e

Cash register

SENTO LAN E uses the housing of the well-known and well-received SENTO E cash register, it has all the functions of the SENTO E cash register, but its technical parameters and new functionalities move the SENTO LAN E cash register to a completely different, higher segment of cash registers.

Communication is the basis • The cash register connects with a computer via RS232, USB and LAN connectors, allows you to connect a barcode reader - also USB, electronic scales, an order printer, payment terminal or pin-pad. Communication with the computer can be done online, as in the case of large cash register systems. The cash register has an online buffer of receipts that can hold up to 20,000 items.

Additional functions and ease of use • The names of the programmed products can have up to 40 characters, the product database can contain up to 16,000 PLU items. You can add a definable description to each item sold on the receipt. Other new features in this cash register model include printing the customer's tax identification number on the receipt along with its presentation on the customer's display, programming of graphics in the receipt footer, transfer of data between cash registers or a computer via external memory, the ability to print barcodes and QR codes on non-fiscal printouts. Fujitsu's "drop in and work" mechanism greatly improves paper exchange operations and the time to print receipts and reports is very short. In addition, the possibility of using a roll of paper with a length of 60 metres will allow for long, uninterrupted operation of the device.

Data always available • The µSD card reader, on which the electronic copy of printouts is registered, is mounted at the bottom of the cash register, and the card itself is available to the user. The data stored on the card can be printed by the user in full or in part.

Data parameters

Number of products	50 000
Number of PTU rates	7
Number of cashiers	32
Product name	40 characters
Euro currency support	yes (multi-currency)

Printing Mechanism

Type	thermical, FUJITSU FTP 628
Paper width • roller lenght	57 mm • 60 m

Keyboard

Type	mechanical (switch)
Number of buttons	33
Quick sale buttons	14 buttons, 28 combinations + 10 in quick sale mode

Displays

Client	graphic LCD, iluminated, 132x32 pixels
Cashier	graphic LCD, iluminated, 132x32 pixels

Interfaces

Communication connection	3 x RS232, 1 x USB klient, 1 x USB host, 1 x LAN
Cooperation with devices	computer RS232/USB/LAN, scanner RS232, scanner USB, weight, multiplexer, EFT terminal (RS, LAN), pin pad, order printer, monitoring, Bluetooth module, GPRS modem, WiFi module, USB keyboard, flash disk
Cash drawer control	yes, passive 6-24 V

Power supply

External	External power supply 230 V / 12 V; 2 A
Internal	Built-in gel battery 6 V; 3 Ah

Dimensions

Width / Height / Depth	299 x 100 x 212 mm
Weight:	1,8 kg

212 mm
100 mm
299 mm
